The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/756,588	Applicant(s) DIEDERICH ET AL.	
	Examiner Kevin T. Truong	Art Unit 3734	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/26/2007 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 64-67, 70-81, and 84-92 are rejected under 35 U.S.C. 103(a) as being unpatentable over Swaminathan (U.S. 6,517,533).

Swaminathan discloses in figure 10, a balloon (98) mounted on the distal end of the catheter (90), wherein the balloon includes a sensor (106) for sensing and monitoring the temperature of the rectal wall and the surface of the prostate gland during the treatment of the prostate gland as well as fluid within the balloon (98) (see col. 6, line 32 thru col. 8, line 20); and furthermore, circulating and replacing fluid through lumens (96,100,108) below or higher normal body temperature during the treatment of the prostate gland by thermotherapy. It is

note that Swaminathan does not specifically point out the steps of placing the distal end of the catheter (90) in a space neither between the rectum and the prostate gland nor between the target tissue site and a sensitive healthy tissue. However, it would have been obvious matter of design choice to used the Swaminathan's catheter assembly performing the steps of placing the distal end of the catheter (90) in a space between the rectum and the prostate gland or between the target tissue site and a sensitive healthy tissue and it appears that the Swaminathan's catheter assembly would perform equally well as of applicant's catheter assembly.

Response to Arguments

4. Applicant's arguments with respect to claims 64-67, 70-81, and 84-92 have been considered but are moot in view of the new ground(s) of rejection.
